Flow Control

Tyco Water

TYTON JOINT pipeline fittings are manufactured to AS/NZS 2280.

Features

- Ductile Iron fittings for high strength and impact resistance
- Extremely strong and efficient flexible joint
- Suitable for 'in ground' or 'above ground' applications
- All fittings up to and including DN300 are supplied with a thermally bonded polymeric coating for long life corrosion protection.
- Fittings DN375 and above are cement lined/bitumen coated or can be polymeric coated to suit local utility specifications.
- The TYTON® socket profile provides the flexibility of using TYTON gaskets for ductile iron OD compatible pipes, PLASTYT® gaskets for series 1 PVC pipes or TYTON-LOK® gaskets for restrained joints
- Joints can be deflected and permits axial movement to compensate for thermal expansion and contraction

General Application

TYTON JOINT® pipeline fittings are used in the construction of new pipelines.

Note - Some fittings have been superseded by the AUSLITE range. Please refer to the AUSLITE fittings datasheet for information.

Technical Data

Size Range: DN100 - DN750

Allowable Operating Pressure: 1600kpa and 3500 kPa

Standards:

AS/NZS 2280 - Ductile iron pressure pipes and fittings

Certification:

ProductMark Licence
PRD/R61/0412/1

Certified to AS 4020 - Suitable for contact with drinking water.

TYTON JOINT® Pipeline Fittings

DN100 - DN750

Socket Dimensions
