

## Tyco Water on Show at CIVENEX 2011

Tyco Water has been active on the trade show scene in recent months, exhibiting again in May at CIVENEX 2011. The event held at Eastern Creek is the premier exhibition for the Local Government and the Public Works Industry.

Tyco Water was present to display its complete systems approach to water infrastructure supply with a range of products on display from polyethylene fittings to DN600 Integral Bypass Valves.

A much appreciated feature of the stand was the VIP seating area behind the marquee where customers could come and enjoy a barbeque lunch and refreshing beverages whilst unwinding from the day's festivities.

Tyco Water would like to thank the staff who attended the event as well as our many customers who came out to see us on the stand and enjoy a meal.
