

## AUSTRALIA'S MOST OUTSTANDING PROJECT FOR 2008

Perth's Saltwater Desalination Plant was recently declared as Australia's most outstanding example of construction excellence at the 2008 Australian Construction Achievement Award dinner, held in Melbourne on Friday the 9<sup>th</sup> of May 2008. The award was presented by the Governor-General of Australia, Michael Jeffrey, and was accepted by Marshall Hudson on behalf of Brookfield Multiplex.

Tyco Water successfully provided Mild Steel Cement Lined SINTAKOTE<sup>®</sup> DN1200 & DN1400 pipes, connecting the Desalination plant to the Thomson reservoir and the Thomson reservoir to the Integrated Water Supply Scheme. Tyco Water also supplied the DN200 Ductile Iron pipe and fittings for the fire service ring main at the Desalination Plant Site.

Perth's desalination plant is a classic example of how Tyco Water continues to provide superior pipeline products, to many of Australia's most significant engineering feats.
